

I would support the recommendations in proposal RM-10867. this would modernize the amatuer service, and provide access to many more potential HAMS. The Amatuer Radio Service is experiencing a decline in participation. partly due to archaic attitudes and an aura of inaccessibility to many average Americans. And partly due to poor public image and exposure. Lets change this, lets make the adjustments recommended in RM-10867, and bring the Amatuer radio Service into the current millenium!
